

Writing the converse, inverse, and contrapositive of a conditional statement and determining their truth values

The table below gives the number of calories for each type of candy in a certain box. These are the only types of candy in the box.

Type of candy	Number of calories
Chocolate	250
Butterscotch	200
Caramel	300
Cinnamon	250
Peppermint	150

A conditional statement is given below. Give the converse, inverse, and contrapositive of the statement. Also use the table above to decide if each statement is true or false.

Assume that any candy mentioned comes from the box.

Given statement	If a candy has 250 calories, then the candy is cinnamon.	☐ True	☒ False
Converse	If a candy is cinnamon, then the candy has 250 calories.	☒ True	☐ False
Inverse	If a candy does not have 250 calories, then the candy is not cinnamon.	☒ True	☐ False
Contrapositive	If a candy is not cinnamon, then the candy does not have 250 calories.	☐ True	☒ False
