

$$0.10 + 0.12 + 0.28 + 0.28 = 0.78$$

Measures of Center:

Mean, Median

Measures of Spread:

Range, IQR

2 - Show your work. If using the calculator, write what you put into the calculator.

5 - Put each Summary value in the correct location and define it in your own words.

16% of county earn less than Coleman
84% of county earn more than Coleman

What are the five numbers and their percentiles that the box-and-whisker are based on?

min Q_1 median Q_3 max
0th 25th 50th 75th 100th

6 - Pick one of the percentiles and write the TWO ways you could interpret a percentile.

Define the IQR in your own words.

IQR = $Q_3 - Q_1$
middle 50%
How wide the box is

7 - Answer the questions above.

Positive:

x: increase

y: increase / decrease

Negative:

x: increase

y: increase / decrease

8 - Circle the correct one for each association.

$$P(B_{7,0.75} \leq 4)$$

15 - Show your work. If using the calculator, write what you put into the calculator.
